

INTRODUCTION

Shield Red Oxide is an alkyed based primer to be used on all types of metals except galvanized sheet where SHIELD GALVANIZED PRIMER must be used. Shield Red Oxide is used to prevent rusting of the metal.

FINISH

Shield Red Oxide is red in color primer

APPLICATION

Shield Red Oxide can be applied using a brush or spray gun. Before applying Shield Red Oxide the surface must be cleaned with AZAR THINNER then dried with piece of cloth or duster. Two coats of Shield Red Oxide is recommended. SRO must be diluted up to 20% with AZAR THINER or SAVANA TURPENTINE

DRYING TIME

Touch Dry = 2 – 3hrs
Recoat = after 8hrs

SPREADING RATE

10 – 12 M² lts. This spreading rate can vary due to surface conditions.

PACKAGING

Shield Oxide Primer comes in 1ltr or 3.6ltr containers
