

## INTRODUCTION

Shield Stabilizer is an acrylic water-based anti-fungus primer that can be used on new and old masonry surfaces.

## APPLICATION

Before applying Shield Stabilizer, the surface should be cleaned properly to remove dust, loose particles, and fatty stains. Moreover, Shield Stabilizer is recommended for application on new and old masonry surfaces only.

After priming, Shield Acrylic Emulsion Paint should be applied for finishing.

## FEATURES & BENEFITS

Shield Stabilizer is an acrylic-based primer, which, when applied, forms a layer between the concrete and the final paint coat.

## COMPOSITION

Shield Stabilizer is an acrylic-based, water-soluble primer that contains fillers, extenders, and titanium dioxide.

PROPERTIES	ANALYSIS
Appearance:	Milky white primer
PH:	8-9.
Solid Content:	20%
Density:	1.12 g/L
Coverage:	5 - 6 m <sup>2</sup> /L
Dilution:	10 - 15 % with water
Drying Time:	30 Minutes
